

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Data Science Master

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Domain: Data Science

Anjali Kumari

Roll No. 2410031047 | B.Tech CSE

April – June 2026

Anjali Kumari

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410031047

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE

Internship Domain

Data Science Master

Duration

8 Weeks | April – June 2026

EduSkills, AICTE & Industry-Aligned Learning

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme “Nation Building Through Skills.” It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the Data Science Master track, EduSkills has designed an industry-aligned curriculum, supported by Siemens Industry Software (India) Pvt. Ltd, that helps engineering students build practical, job-ready skills in data analysis, visualization, and machine learning.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018 certified organization.

AICTE Patronage

Run under the AICTE National Internship Portal.

Industry-Ready Curriculum

Job-ready skills in data analysis, visualization & ML.

Bridging Theory and Practice in Data Science

Although many engineering students learn the theoretical foundations of statistics and programming during coursework, very few get structured, hands-on exposure to working with real-world datasets, applying statistical techniques, and building machine learning models using an industry-standard toolset such as Python, Pandas, and scikit-learn. Concepts such as data cleaning, exploratory data analysis, and predictive modelling are often understood only theoretically.

This internship addressed that gap — practically learning the full data science workflow:

What the Internship Set Out to Achieve

Python for Data Science

Strengthen core Python programming for data analysis.

NumPy & Pandas

Learn data manipulation, cleaning & wrangling.

Data Visualization

Build visual insights using Matplotlib & Seaborn.

Statistics & Probability

Understand descriptive & inferential statistics.

Machine Learning

Build supervised & unsupervised ML models.

Feature Engineering

Apply feature engineering & model evaluation.

Capstone Integration

Combine the full data science workflow into one project.

Final Assessment

Clear the Final / Internship Grade Point Assessment.

The Toolkit Behind the Internship

Python

Core language for data science

NumPy

Numerical computing

Pandas

Data manipulation & cleaning

Matplotlib

Data visualization

Seaborn

Statistical visualization

Probability & Stats

Descriptive & inferential statistics

scikit-learn

Machine learning models

Jupyter / Colab / Git

Dev, notebooks & version control

From Raw Data to a Trained Model

Data Collection Layer

Gathering raw data from datasets/files used for analysis.

Data Preparation Layer

Cleaning, transforming & preprocessing using Pandas and NumPy.

Exploratory Analysis Layer

Statistical summaries & visual exploration using Matplotlib and Seaborn.

Modelling Layer

Building supervised & unsupervised ML models using scikit-learn.

Evaluation Layer

Assessing model performance using appropriate metrics & validation.

Assessment Layer

Weekly quizzes, assignments & Final Grade Point Assessment.

The 8-Week Learning Journey

1 WEEK

Introduction to Data Science

Data science lifecycle, roles & applications; intro to Python.

2 WEEK

Python for Data Analysis

NumPy & Pandas for manipulation, cleaning & EDA.

3 WEEK

Data Visualization

Visual insights using Matplotlib & Seaborn.

4 WEEK

Statistics & Probability

Descriptive & inferential statistics, distributions, hypothesis testing.

5 WEEK

Machine Learning Basics

Supervised & unsupervised learning, regression & classification.

6 WEEK

Advanced Machine Learning

Model evaluation, feature engineering, ensembles & clustering.

7 WEEK

Model Deployment & Tools

Deployment concepts & real-world data science tools.

8 WEEK

Capstone Project

Full workflow applied to a real-world dataset & reporting.

Skills & Capabilities Gained

- ✓ Ability to apply Python programming to real-world data analysis tasks.
- ✓ Practical understanding of data cleaning and manipulation using Pandas and NumPy.
- ✓ Hands-on exposure to data visualization using Matplotlib and Seaborn.
- ✓ Capability to apply statistical concepts and probability to data-driven problems.
- ✓ Skill to build, train, and evaluate machine learning models using scikit-learn.
- ✓ Ability to integrate the complete data science workflow into a working capstone project.
- ✓ Successful completion of the Final Assessment / Internship Grade Point Assessment, resulting in an “Outstanding” grade.

CERTIFICATION

Successfully Completed

Grade

O – Outstanding

Certificate ID

420d992094f9d74a558e

Student ID

anjali.kumari.cs28@iilm.edu

Duration

8 Weeks | April – June 2026
